NATURAL LIME MORTARS

**kalnatur®**

NATURAL LIME MORTARS

**KALNATUR** is a registered brand dedicated to the production of high-quality lime mortars and solutions, designed for coatings, renders, and fine finishes in construction projects. Our eco-friendly product range includes fine and extra-fine mortars, textured mortars, lime putty plasters, and lime-silicate mortars, all made from natural materials.

They are ideal for both new construction and heritage restoration projects, providing a refined aesthetic and high-end decorative finish for both interior and exterior spaces.

## MISSION & VISION

At **KALNATUR**, our mission is to provide sustainable, high-quality construction materials that respect the natural balance. We aim to transform the urban environment with lime-based solutions inspired by nature, promoting the preservation of architectural heritage and encouraging responsible construction practices that benefit both communities and the environment.

We aspire to become a leading brand in eco-friendly construction materials, recognized for our commitment to sustainability, innovation, and quality in every one of our products. Our goal is to position ourselves in the global market as a benchmark in the use of lime mortars for high-end decorative and restoration projects, contributing to a future where construction and nature coexist in perfect harmony.

TIMELESS  
COATINGS,  
TEXTURES AND  
FINISHES

At **KALNATUR**, we are committed to delivering solutions that respect both nature and architectural heritage. We strive at every stage of production to ensure products that preserve the integrity and beauty of buildings, without compromising environmental health. We value the trust of our clients, with whom we build long-lasting relationships based on transparency, quality, and social responsibility.

We firmly believe in the positive impact a company can have on its community and environment. Our commitment is to promote ethical practices, contribute to the development of our communities, and support cultural and heritage preservation projects. Our approach to social responsibility extends to initiatives that encourage the use of respectful and durable construction materials, benefiting both society and the environment.

## KALNATUR

### OUR HOME

As part of our commitment to the planet, KALNATUR develops its products under strict ecological standards. We use natural raw materials and sustainable production techniques to reduce our environmental impact.

Our lime mortars are a conscious alternative that respects the natural cycle, promoting construction solutions that not only enhance the environment but also protect it. We strive to be a positive force in environmental conservation, ensuring that each product contributes to the well-being of both our planet and our homes.

## OUR PHILOSOPHY

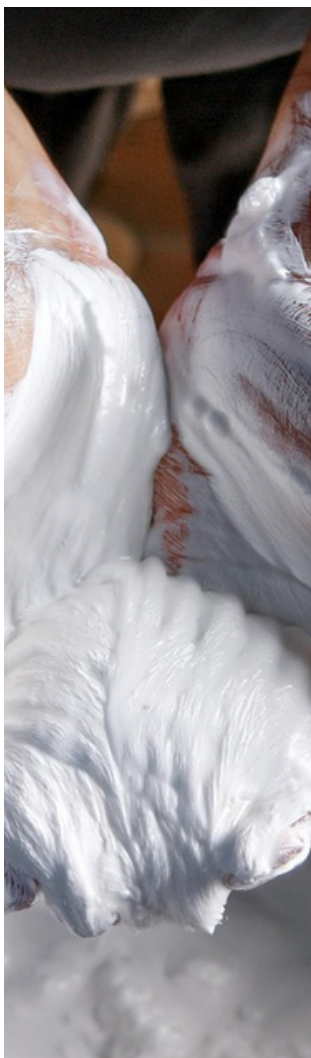

The Wabi-Sabi philosophy, which celebrates the beauty of imperfection, the natural, and the transient, aligns perfectly with the values and essence of **KALNATUR**. This approach connects the authenticity of materials with an organic and balanced aesthetic, highlighting lime as a noble and versatile resource.

In interior design, **KALNATUR** enhances serene and natural environments through unique textures, soft colors, and finishes that embrace the inherent irregularities of the material. This allows the creation of spaces where intentional imperfection and simplicity evoke an emotional connection with nature and the surrounding environment. Furthermore, as a sustainable material, lime becomes a cornerstone of conscious and harmonious design, reinforcing ideals of durability and respect for the environment.

The philosophy of **KALNATUR** as a brand is based on transforming coatings into a second skin for the home, enveloping each space with materials that breathe authenticity, elegance, and harmony. Its carefully crafted sustainable products not only fulfill an aesthetic function, but also elevate the experience of inhabiting a space, integrating naturally with architecture and design.

Each surface created with **KALNATUR** becomes a timeless canvas, where the unique beauty of its finishes generates a deep connection between the visual, the spatial, and the sensory.

From subtle textures to organic tones, every detail invites the experience of a serene and emotionally enriching environment—one that endures over time and redefines the concept of home.

## PRODUCTS

# Kolzen<sup>extra-fine mortar</sup>

**Extra-fine lime and silicate paste mortar**

Kolzen by KALNATUR is a lime and silicate mortar distinguished by its exceptionally smooth texture and its ability to achieve ultra-fine finishes. This type of mortar is primarily used for decorative applications and high-end finishes in luxury developments, heritage restoration projects, and sustainable architecture.

chemicals

Fine lime & silicate  
paste mortar

# Kasium

Decorative coating with a matte mineral finish

Fine Silicate Paste Mortar is composed of a blend of high-purity lime, aggregates, and carefully selected silicates. It is suitable for coating walls and surfaces, both interior and exterior, providing a superior fine texture and finish. It is also ideal for the rehabilitation and restoration of walls and façades. Fungicidal and bactericidal properties. High resistance and flexibility Excellent adhesion. Water-resistant and breathable (vapour permeable). Suitable as a base for high-end decorative coatings and ETICS systems

# Kalgue<sup>extra-fine</sup> mortar

Lime adhesive mortar

Single-component adhesive mortar based on air lime in paste form. It is highly breathable and offers excellent flexibility. It is ideal as a base coat to ensure adhesion and ease of application of finishing mortars. It is recommended for the installation of tiles, ceramic and porcelain slabs, as well as marble panels. Additionally, it is suitable as a repair mortar in rehabilitation and restoration projects of historic buildings.

# Texturzen

Mortar for textured and decorative finishes

Natural air lime paste mortar, ideal for creating textured decorative and high-end finishes. It delivers unique results that highlight the natural qualities of lime, allowing for a wide variety of textures in both interior and exterior spaces.

Key properties:

- Compatible with traditional materials, ideal for restoration projects
- High-quality aesthetic finish with pigmentation possibilities
- Good durability and resistance in dry climates
- Antibacterial and antifungal due to its high pH
- Unique, original, modern, and avant-garde textures

# Wabizen<sup>extra-fine</sup> mortar

Lime paste-based coating with a matte mineral finish

Extra-fine lime mortar characterized by its exceptionally smooth texture. It is ideal for decorative applications and high-end finishes in luxury developments, heritage restoration projects, and sustainable architecture.

Key properties:

- High-quality aesthetic finish
- Provides an extremely smooth and uniform surface
- Adapts well to minor structural movements
- Ideal for the restoration and rehabilitation of historic buildings
- Good durability and resistance
- Antibacterial and antifungal due to its high pH

# Lime-based stucco paste Zenart

**Decorative coating designed for high-quality smooth and textured finishes**

Natural decorative coating based on high-purity artisanal lime paste. Suitable for both interior and exterior applications, it is ideal for the restoration of historic buildings, eco-friendly construction, new builds, and high-end decorative finishes. It provides smooth or textured high-quality finishes, made from carefully selected lime and clean calcium carbonates. Key properties:

- Excellent breathability and moisture regulation
- Vapour permeable
- Forms a strong and durable surface
- Visually appealing finish, allowing smooth or textured surfaces
- Antibacterial and antifungal due to its high pH

DATA SHEET

# Zenkai

## Base coat paste mortar

ZENKAL is a natural base mortar. It is ideal for base coats, jointing, and applications in rehabilitation and restoration projects of historic buildings. It is applied as a first regulating layer, thanks to its coarse aggregate composition.

Fine lime paste mortar is a homogeneous mixture made from air lime (fat lime or slaked lime in paste form) and selected aggregates. Its most distinctive feature is its smooth and creamy texture, which allows for easy application in layers over walls, ceilings, and other surfaces.

# Kalzen

Traditional limewash  
Mineral lime-based paint formulated with high-purity lime

Suitable for coating walls and ceilings, it is used for decorative finishes, particularly in high-end projects, renovations, rural constructions, and eco-friendly buildings. It is made from carefully selected lime and clean calcium carbonates.

Key properties:

- Extremely high-purity lime, aged for more than two years
- Suitable for wall and ceiling coatings
- Ideal for buildings exposed to temperature variations
- Provides thermal and acoustic insulation
- Creates a comfortable indoor environment
